Professional Experience

Senior Developer

CompanionLabs | August 2018 – Present | Remote

- **Lead UI/UX in conjunction with Google to build out CompanionLabs Google product.**
- Reduced application bundle size by **300%+** through bundle analysis and optimizations to code base.
- Maintain and help define new features through user stories, interviews and rapidly iterating on prototypes.

Technology: React, Node, GraphQL, AWS, PostgreSQL

Senior Web Developer / Web Development Manager

Dutch Bros Coffee | May 2017 – August 2018 | Grants Pass, OR

- **Lead a small team of software developers in building an internal business portal and several online stores.**
- Built a financial reporting application that provided P&L statements and comparisons among 300+ stores.
- Mentored other developers through 1-on-1's, technical training and leading by example.
- Managed projects using Trello and Wrike.

Technology: Javascript, Node, React, PHP, Shopify, MS SQL Server

UI/UX Engineer

IgnitionOne | July 2015 – March 2017 | Remote

- **Successfully worked on a large, international team to rebuild IgnitionOne's flagship Display platform working with domestic and international teams.**
- Worked directly with Creative Director in defining UI components and style guide.
- Created an in-house solution for capturing screenshots of advertisements for previews used within the Display platform.

Technology: Angular, Node, Stylus, Jade, Gulp, Webpack, Bootstrap, Npm and Bower.

UI/UX Engineer

Coding Zeal | August 2014 – July 2015 | Remote / Medford, OR

- Built an app for OneSight.org utilizing head tracking technology to simulate nearsightedness as part of a campaign to raise awareness of blindness.
- Created a file uploader application for a dental company using Ruby on Rails.
- Implemented a solution for managing schedules for a mobile vet clinic using Ember.

Technology: Ruby on Rails, Ember, Javascript

Owner

Symplex | January 2014 – Present | Grants Pass, OR

Responsible for all aspects of work from requirements gathering, design, development to hosting and maintaining a healthy relationship with clients.

- Designed and built an online drink menu for the largest privately held drive-through coffee chain in the United States.
- Built an order management system using Ruby on Rails for a local coffee shop.
- Built a social network for motorcycle riders.

Technology: React, Node, PHP, Ruby on Rails, Javascript

Consulting Software Engineer

Knotice | July 2013 – January 2014 Grants Pass, OR

- Built landing pages for **Charter Communications**, include a promotion for Anchorman 2
- Built a marketing campaign scheduling app for **Dollar General**.

Technology: Node, ASP.NET, MVC and SQL Server.

UI/UX Designer

Motorcycle Superstore | February 2013 – July 2013 | Medford, OR

- **Designed and help rebuild motorcyclesuperstore.com to be a responsive ecommerce site.**
- Develop and iterate on concepts for web, mobile, and tablet design experiences in a fast-paced team environment.
- Develop and contribute to wireframes, mockups, and interactive prototypes.
- Production of designs and documents for presentation to developers, managers, and senior executives.
- Refined designs, considering live customer data, market research, and usability studies.

Software Engineer II / Senior Software Engineer

Knotice Ltd | January 2008 – July 2012 | Akron, OH

- Created a system for generating mobile-friendly microsites that were triggered via a Microsoft Tag on **Canon** printer boxes.
 - **The mobile web sites were featured on time square in NYC.**
- Developed a REST and SOAP API for the marketing platforms core services, including email sends, content creation, user management, sns and reporting.
- Developed a suite of custom Web Controls used by other developers for rapid development of custom one-off web applications. Custom controls included a gridview, autocomplete, tooltip, modal dialog, paging, listview, textbox and buttons.

Test Automation Engineer / Software Engineer II

2004 - 2008 OEConnection LLC

July 2004 – August 2008

- Defined and built a test automation framework for testing a suite of web based products.
- Built software for selling parts between dealerships.
- Worked with multiple teams to define code quality standards to ensure testability.

Education

Bloc | 2015 – 2016
